## Document Filetype Whitelist

JUNE 2024

Dear EO e-PPS User,

List included in next page is referred.

Kindly note that new security features have been added to the Web Tender Preparation Tool - WebTPT. Economic Operators are therefore advised that filetypes of documents uploaded as part of their tender offer submission must correspond to filetypes included in annexed whitelist.

Economic Operators should note that if they try to upload documents having a filetype not included in same list, this warning will be encountered: Invalid file type. The file could not be uploaded.

At this point, Economic Operators will not be able to continue filling in the offer and subsequently cannot submit their offer. Thus, Economic Operators are once again advised to upload documents which filetype is included in the list.

Your cooperation regarding this new development is appreciated.

IT Unit  
Department of Contracts
