

Dear EO ePPS Users

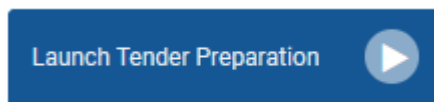

The new ePPS has brought with it a number of changes.

One important change implemented is in the TPT, which is now called the WebTPT.

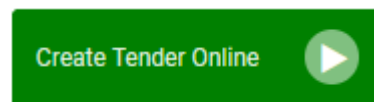

The new WebTPT will not work on Calls for Tenders (CfTs) that were published on or prior to yesterday's implementation date (15/01/2023). In order to check when a CfT was published, one can access the CfT Workspace and look towards the bottom for the entry called **Date of Publication / Invitation**, as shown below:

DATE OF PUBLICATION/INVITATION:	15/01/2023 12:00
TED LINKS FOR PUBLISHED NOTICES:	
DATE OF AWARDING:	
DOES THIS CALL FALL UNDER THE SCOPE OF GPP?:	No
CERTIFICATION CHECK:	No

Therefore, for CfTs that were published prior to this date the previous version of the TPT should be used. This is accessible by clicking on the blue button (see below) called **Launch Tender Preparation**.

For CfTs published after the implementation date, both buttons can be used, but preferably the **Create Tender Online** (green button, WebTPT) should be made use of.

Please do keep in mind that the Launch Tender Preparation, will in the near future, be phased out with only the WebTPT remaining available.

It is recommended that you start making use of the WebTPT as soon as possible.
